FOREX MOTORS FZCO

The 2026 Toyota Tundra CrewMax SR5 combines powerful twin-turbo performance, advanced driving technology in a spacious 5-seater pickup. It is powered by a 3.4-liter twin-turbo V6 engine with intercooling, producing 389 HP (290 kW), and is paired with a 10-speed Direct Shift automatic transmission for smooth and responsive performance. The selectable Sport, Eco, and Normal driving modes allow drivers to adapt the vehicle to different driving needs. With a 4WD drivetrain, 121-liter fuel tank, and fuel consumption of 13.5 L/100 km in the city, 10.6 L/100 km on the highway, and 12.2 L/100 km combined, the Tundra is built for demanding journeys. Its impressive towing capacity of up to 5,060 kg, heavy-duty tow hitch receiver, and trailer brake controller make it a capable choice for hauling and towing tasks.

Inside, the Tundra CrewMax SR5 features fabric seats, heated front seats, and 8-way power-adjustable driver and passenger seats with 2-way power lumbar support for added comfort on long journeys. Dual-zone automatic climate control helps maintain a pleasant cabin temperature, while the leather-wrapped heated steering wheel and leather-wrapped shift knob add a premium touch. The 8-inch Toyota Multimedia system provides convenient access to entertainment and connectivity features, including wireless Apple CarPlay, wireless Android Auto, SiriusXM audio, HD Radio, Bluetooth, Toyota Assistant, and Drive Connect. A 9-speaker audio system further enhances the listening experience.

The exterior of the 2026 Toyota Tundra CrewMax SR5 combines a bold pickup design with functional equipment. It rides on 18-inch alloy wheels fitted with 265/70R18 tyres and features LED fog lamps, an active front spoiler, and a header rail. Safety equipment includes driver and front passenger airbags, front seat side airbags, roll-sensing front head and side curtain airbags, and driver and front passenger knee airbags. Child-protector rear door locks add another layer of protection for families. Furthermore, Electronic Brake-force Distribution (EBD), Brake Assist (BA), Vehicle Stability Control (VSC), Traction Control (TRAC), Smart Stop Technology, and Hill-Start Assist Control help support controlled driving. Toyota Safety Sense 2.5 adds advanced driver-assistance features, including the Pre-Collision System, pedestrian and oncoming-vehicle detection with braking, Lane Tracing Assist, Lane Departure Alert with Steering Assist, Automatic High Beams, Dynamic Radar Cruise Control, and Emergency Steering Assist.
